10. The people that are showing up to put stones on the ice at 7:00am on Sundays are getting very tired because it's less than a handful of people moving 80 stones that weigh 43 pounds each. You do the math. Then those same people are also setting up hacks, putting out scoreboards, mopping, pebbling, nipping, setting up the LTC room, putting out the brooms and grippers, etc. Many hands make light work so set your alarms clocks for an earlier time and come help get \*YOUR\* sheets ready for play. And if you're just curling in the second draw, we're always looking for moppers and nippers! Sometimes our ice crew is still in their game so a fast turnaround is necessary. You can help out by mopping any of the empty sheets so that the pebbler can get right to it. Once the pebbler finishes, then the nipper goes.
